STEEL BALE RACKS

BALE THROWER RACKS

FLAT RACKS

ROTARY BALE CARTS

MULTI-PURPOSE WAGONS

COMPACT DUMP TRAILERS

NURSERY WAGONS

ATV DUMP TRAILERS

FLAT RACKS

The flat racks are an all steel construction. This design has proven to be durable under the demanding requirements of large round and square bale hauling. Sturdy formed side rails prevent snagging on door jams, etc.

All end gates are removable. Front and rear slant end-gates are standard. Standard width is 8'5".

Options include: Nylon straps and winches, light kit, extended rear hitch, 6' high rear end-gate.

MESH FLOOR

The open design of heavy 7 gauge grating floor discourages chaff build-up. 16" crossbar spacing provides good floor support.

STEEL BOARD FLOOR

The steel board floor will not damage twine or net wrap when bales are pushed across the floor. Gaps between the boards allow chaff to drop down.

CHECKER PLATE FLOOR

Checker plate floor is a durable non-perforated floor. It is a popular choice for fruit or vegetable bins being loaded and unloaded with forklifts.

BALE RACKS

COMBO BALE RACK

The Combo Bale Rack is a combination round and large square bale rack. Crossbars are spaced at 16" centres to carry all sizes of large bales on an open floor. A tubular side rail provides extra strength.

The Combo Bale Rack is available in four lengths at a width of 8 ft. 4 inches.

The 20 ft. & 25 ft. models have 8" main beams, the 30 ft. uses 10" main beams and the 36 ft. has 12" main beams for greater rigidity.

ALL-STEEL, ADJUSTABLE & NON-ADJUSTABLE BALE RACKS

These racks are of all steel construction. The extensive field use and testing has proven this design to be adequate in strength and durability. Available in both regular straight bar or the curved bar design as shown in the picture. The curved bar tilts the load towards the centre for greater stability.

The non-adjustable racks are of all-welded construction and available in various lengths and widths for different size and number of bales.

Adjustable racks have movable cross members which can be set anywhere along the entire length of the rack.

Clamping method is simple and rigid and easily adjustable. Cross members are removable for shipping or storage.

The longitude beams on the 30 ft. model are 10 x 4 x .188 H.S. Tube. The longitude beams on the 20 or 25 ft. model are 8 x 4. The cross members are 3 x 5 x 150 H.S. Tube.

BALE THROWER RACKS

The Bale Thrower Racks are of all steel construction. The flared top provides a larger bale retaining area. This translates to less misplaced bales to pick up at windrow corners, etc.

A 36" fold-down front with steel mesh provides a platform for front unloading. Large 66" side openings have easy access swing open doors.

- Main beams are 8 x 3 x 188 H.S. tubing
- 3 x 2 x 125 H.S. cross members are spaced at 16" for sturdy floor support
- Durable 7 gauge grating floor
- Standard size 8-1/2' x 20' x 8' high
- Extended rear hitch kits available.

SLANT BAR FEEDER WAGON

These feeder wagons are all steel construction. Extensive field use has proven this design to be excellent in strength and durability.

Both sides of hinged cradle swing completely from side to side.

The high capacity 14" deep pan is made of 12 ga. sheet metal, ensuring long term usage is never a problem. The "V" centre keeps the feed within easy reach of cattle. Each Slant Bar Feeder Wagon is equipped with 4000 lb. hubs and spindles as well as a quick hitch tongue for ease of use. Comes with 11L x 15 - 8 ply tires. Also available with used pick-up truck tires.

The hinged hay cradle and rear fold up panel allows for easy clean-out after use.

MULTI-PURPOSE WAGONS

MODEL 4572

...with 4-Wheel Steering

- Two position hitch which extends for tractor hauling and retracts for manual use.
- Automatic parking brake (brake released when handle is pulled forward)
- Excellent choice for feeding large, square bales inside barns.
- End-Gates removable.
- Deck on 4572D locks up and latches down.
- Track width is 28".

MODEL 4572 D

Model	Platform	Tire Size	Capacity
4560	30 x 60	4.80 x 8	1,500 lbs.
4572	30 x 72	4.80 x 8	1,500 lbs.
4584	30 x 84	4.80 x 8	1,500 lbs.
45100	30 x 100	4.80 x 8	1,500 lbs.
4572 D	30 x 72	4.80 x 8	1,500 lbs.
4160	30 x 60	13 x 5.00 - 6	1,200 lbs.

MEDIUM DUTY WAGONS

MODEL 4160

MODEL 4160

The Medium Duty Wagon is a cost effective alternative where the added features of the Multi-Purpose Wagon are not needed.

- Two-wheel axle pivot steering provides very short turning radius.
- 13 x 5.00-6 tires are capable of carrying 1,200 lbs.

NURSERY WAGON & BALE CART

#510
NURSERY WAGON
SOLID METAL DECK
5' x 10'

- Easy to maneuver small turning radius
- 4 wheel steering and rear hitch for self tracking trains
- Sheet or expanded metal deck
- Fold down side bar locks up without pins
- 5th wheel or auto type steering
- Standard tire size 18-8.50 x 8
- 3,000 lb. cap
- We will custom build any size needed
- Spring suspension available

#RO 48
STANDARD ROTARY
BALE CART

- Low cost method of feeding round bales in the stable
- Four wheel steering for tight corners
- Easy to convert from two to four wheel steering or vice-versa; simply move one bolt
- Rotary table mounted on tapered roller bearings
- Table lock to prevent undesired rotation
- Brake on when handle is up
- Can be supplied with quick change brackets for easily switching handle to front or rear

COMPACT DUMP TRAILER CDT-2T

The Compact Dump Trailer

is a small hydraulic dumper which works well with 25-50 hp compact tractors. For tow vehicles without hydraulics a 12V power pack can be installed on the trailer. Box size is 48" x 84" x 18" deep. Trailer capacity is rated at 2 tons. Standard tire size 20.5 x 8-10 10 ply.

COMPACT DUMP TRAILER CDT-3T

The CDT-3T Tandem Axle Compact

Dump Trailer is a slightly larger hydraulic dumper which works well with 25-50 hp compact tractors.

For tow vehicles without hydraulics a 12V power pack can be installed on the trailer. Box size is 54" x 96" x 18" deep. Trailer capacity is rated at 3 tons. Standard tire size 20.5 x 8-10 10 ply.

425 COMPACT WAGON GEAR

SHOWN WITH
16 X 6.50-8 TIRES

- short turning radius
- ball joint steering
- 5 bolt hubs c/w tapered roller bearings
- adjustable reach pole
- 4,000 lb. cap

OPTIONAL 52" X 96" DECK

SHOWN WITH 22 X 11-8
KNOBBY ATV TIRES

ATV DUMP TRAILERS

↑ ATV 12

- 32" x 48" box
- 12 cu. ft.
- AT18 x 9.5-8 knobby ATV tires
- lift out tail gate

↑ ATV 20

- 42" x 60" box
- 20 cu. ft.
- AT22 x 11-8 knobby ATV tires
- lift out tail gate

↑ ATV 25

- 42" x 56" box
- 25 cu. ft. cap
- drop centre floor
- AT22 x 11-8 knobby ATV tires
- lift out tail gate

→ ATV 30

- 48" x 66" box
- 30 cu. ft. cap
- drop centre floor
- walking tandem axles
- AT22 x 11-8 knobby ATV tires
- lift out tail gate

← ATV 30HYD

The hydraulic dump version of the ATV30 has a single acting cylinder and a 12V hydraulic power pack installed. Up and down remote switch has a 20 ft. cord. 12V power can be drawn from tow vehicle or by an auxilliary battery.

ATV LOG SKIDDER

- Made specifically for ATV's and small tractors
- Constructed of heavy 2" X 3" steel tubing
- 2" Ball receiver
- 2000 lb 12V Electric winch connects to your ATV battery
- Heavy duty cable roller fair lead
- Dimensions 66" L X 48" W X 48" H
- Weight: 200 lbs
- Two large 22" ATV tires for easier pulling

- Pulls logs through brush, up or down grades
- Front of the log is chained into the yoke and off the ground for pulling
- Almost eliminates all log to ground friction while pulling
- Logs pull easily with your ATV
- Keeps logs cleaner by skidding them off the ground
- Easy hook up and release of log
- Reduces wood handling by getting logs to one location for cutting / splitting or sawing
